PROFESSIONAL SUMMARY

Results-driven Mobile & Web Developer with 5+ years of hands-on experience building scalable, production-ready applications using Flutter, React.js, Node.js, Firebase, and MySQL. Proven expertise in Clean Architecture, MVVM, and modular design patterns for cross-platform mobile and responsive web solutions. Skilled in end-to-end delivery from architecture design and UI/UX implementation to REST API integration, real-time features, database optimization, and Play Store deployment. Strong collaborator in agile teams with a track record of translating business requirements into reliable, high-performance software.

TECHNICAL SKILLS

Frontend	React.js, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Redux
Mobile	Flutter, Dart, Provider, BLoC, Clean Architecture, Repository Pattern
Backend	Node.js,Next.js, REST APIs, JWT Authentication, OAuth 2.0
Database	Firebase (Firestore, Auth, FCM, Cloud Storage)
Cloud & DevOps	Firebase Hosting, Google Cloud Platform, Git, GitHub, CI/CD
Tools	Android Studio, VS Code, Postman, Jira, Figma

PROFESSIONAL EXPERIENCE

Flutter & Frontend Developer | *Bizturn Technologies* *May 2020 – Present*
Chennai, Tamil Nadu

- Architected and developed 8+ cross-platform mobile applications using Flutter with Clean Architecture and Repository Pattern, ensuring scalable and maintainable codebases.
- Built and integrated Node.js backend services with RESTful APIs, Firebase Auth, Firestore, Cloud Storage, and FCM for real-time data synchronization and push notifications.
- Designed and optimized MySQL and Firestore database schemas with efficient queries, reducing read/write costs by 40% and improving real-time performance.
- Converted complex Figma UI/UX designs into pixel-perfect, production-ready interfaces for both mobile (Flutter) and web (React.js) platforms.
- Implemented secure authentication flows including JWT, OAuth 2.0, role-based access control, and partner-restricted logic to ensure data security.
- Managed full app lifecycle including versioning, build signing, Play Store deployment, and post-launch performance monitoring for multiple applications.
- Developed reusable component libraries, repository layers, and utility modules that reduced development time by 30% across projects.

KEY PROJECTS

MoBooM – eCommerce Web Application *Feb 2025 – Present*
React.js | Firebase | Java-script |Bootstraps | Material UI

- Developed a full-featured eCommerce platform with product listing, advanced search, cart system, and user authentication using React.js and Node.js backend.
- Built RESTful API endpoints for order processing and inventory management integrated with Firebase Auth, Firestore, and MySQL database.
- Implemented Material UI-based reusable component system and optimized page performance and SEO visibility, achieving 40% improvement in load times.

Inspire Packers & Movers – Customer & Partner App *Jan 2023 – Jan 2025*

Flutter | Firebase | Google Maps | FCM | Fire store |google clouds

- Built a full-stack logistics application with separate Customer and Partner modules featuring bookings, live GPS tracking, quotation workflows, and order management.
- Implemented Repository Pattern for clean architecture with Node.js backend APIs and designed end-to-end Firestore schema for customers, partners, and order workflows.
- Integrated Google Maps with live location tracking, address autocomplete, route optimization, and push notifications via Firebase Cloud Messaging (FCM).
- Developed partner onboarding flow with document verification, work-proof uploads, job acceptance logic, and real-time status updates for order lifecycle management.

Inventory Management System *May 2020 – Aug 2021*

Flutter | Fire stores | Dart |Rest APIs| Firebase

- Designed and developed a multi-role access control system (Admin/Manager/Staff) with Node.js backend and MySQL database for product, stock, and supplier management.
- Integrated barcode/QR scanning for fast inventory operations, automated low-stock alerts, and built comprehensive sales/purchase tracking dashboards with real-time data sync.
- Implemented RESTful APIs for CRUD operations on products, suppliers, and purchase orders with input validation, error handling, and optimized MySQL query performance.
- Designed responsive Flutter UI with role-based navigation, data export features, and offline-capable local caching for seamless field operations.

Internal HRM System *Sep 2021 – Dec 2022*

Flutter |Fire stores | Firebase| Firebase Auth

- Built a comprehensive HR management system with employee records, profile management, attendance tracking, and leave request workflows with approval chains.
- Developed payroll calculation engine handling allowances, deductions, overtime, and tax computations with automated monthly report generation.
- Implemented role-based dashboards (HR Admin/Manager/Employee) with performance evaluation modules, KPI tracking, and secure Node.js APIs backed by MySQL.
- Integrated Firebase Authentication for secure login, session management, and push notifications for leave approvals and company announcements.

DIGITAL MARKETING & SEO

- Managed SEO optimization, keyword research, on-page/off-page strategies, and technical SEO audits for multiple client websites using Google Analytics and Search Console.
- Executed digital marketing campaigns and email automation workflows using Mailchimp and Sendinblue, improving client engagement rates by 25%.
- Developed and maintained WordPress websites with custom themes, plugin integrations, and performance optimization for improved search rankings.

EDUCATION

BE – Mechanical Engineering *2019*

Paavai College of Engineering, Namakkal

CORE COMPETENCIES

Cross-Platform App Development | Clean Architecture & Design Patterns | RESTful API Design | Database Optimization | UI/UX Implementation | Agile & Scrum | Play Store Deployment | Performance Tuning | Real-Time Systems | Team Collaboration | Problem Solving | Communication

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
